

## Application

My name is Sara, I am from the 11th of april 1997 and I have lived in Denmark my whole life. Last summer I graduated from high school with major in English, History, Danish and Spanish. Throughout high school I was head of the student council, as head of the student council I got the chance to work side by side with the School Principal, the Rødkilde Gymnasium Board of Directors and other young persons with similar interests. I really liked the idea of making a difference and being a part of something bigger, and was also elected to conduct a speech for the 100 years anniversary for women's democratic rights. Since I graduated I have been working as a waiter and later in a kindergarten full time, a job I really enjoyed.

I always liked the close contact with children, and the job I had in a kindergarten in Vejle really confirmed many of the things I had been working with in psychology in high school. Psychology did not only gave me a taste for working with kids but at taste to work with different types of people because of the insight in people I got from the subject. In social studies we among other things worked with different cultures and with different types of people comes different cultures.

I am going to live here in Vilnius with my boyfriend due to the fact that he has signed a contract with the Lithuanian football club Utenos Utenis. I saw it as a fantastic opportunity for me too because of the international experiences I will gain by living in a foreign country, with a different culture. I always thought that differences between cultures has been very exciting and I have travelled a lot with my family in Europe, The United States and Africa. I have learned something new through all my travels and I am not at all done travelling.

I have considered studying law in the near future. Law sounds interesting for me because of the importance of regulations in our societies and of course the search for justice. In the student council I also liked the fact that we could make a difference and have student involvement. I think it is exciting to work with the differences and similarities you can find within law in different countries.

I am interested in working with everything from private tutoring kids, Personal Assistant or Secretary.

You can find my personal contact details in my enclosed CV - and I am available for personal interviews in Litauen 1st of April permanently.
