Language Danish, English, Polish and (understand) Lithuania

---

### **Personal**

I am 20 years old and from Denmark. I will graduate from high school "Viby Gymnasium" in late June this year where I specialize in math, chemistry and physics. Before I went to high school I took a year in USA as an exchange student where I learned about their culture and I became more independent. The trip gave me a lot of qualities and I learned a lot. I am educated personal trainer at the weekends while going in high school. Therefore, I like to keep myself active.

I am interested in languages and have a good ear for language, I am fast to comprehend.

I'm fluent in Danish. Furthermore, I also speak English, Polish and I understand and speak a little Lithuanian. My mother is from Poland which gives me a big understanding of the language. My father on the other hand is from Lithuania. I have been there many times and I understand almost everything. Now I'm looking to expand my Lithuanian language. In High School, I have had Spanish for three years. We had an exchange program where I went to Galicia for a week.

I am also interested in art such as architecture, paintings, and drawings because I love to draw.

### **Earlier jobs**

I have worked at a food restaurant named "Mr. Mums" for about 3 years. I was a cashier and a dishwasher. Later I got the responsibility for all the other dishwashers. I have also worked at "Trio Renseriet" and the gas stations Shell and Cirkel K.

### **Specific qualifications**

Through my school years, I've learned to work well in groups, because I've realized that, usually, compromises between other people's ideas and your own work well in a lot of aspects that maybe you hadn't considered yourself. I always try to appear happy and, in turn, make the people around me happy, because I believe that everything gets easier with a smile.

I am a person who is not afraid to take action regardless at the task. I am a very outgoing person. I am responsible and I'm a fast learner. By nature, I'm a perfectionist and, although I've worked a lot with myself to learn to accept less than perfection, it still shows sometimes.

### **Future**

In my future I want to study "Business development engineer" or "Global management and manufacturing"

*Sincerely*

Louise C. Pavilionis
